=====  
until the RI including the HHRA and ERA are completed and the COCs identified you should stick to full TO-15.

FYI.. See Jeff's messga below

Can we just sample for chlorinates? The last time we found other contaminants. in the full TO-15 that aren't related to the 'site' and there is nothing we can do in terms of remediation.

Denise.

Did we do a limited list (just chlorinates) last time strikes me we did or a full TO-15?

Thank you,

Jeff M. Catanzarita
